LSU and North Carolina State received a large grant. Work regarding Clean Harbors Colfax is being done by these 2 universities. Some of you are aware of the grant. In February the group presented a webinar, and 2 other sessions will follow. I would appreciate it if you would take some time to view the presentation. Share with others if you want to do so.

You can read Wilma Subra's comments that she sent with the information.

Thanks for your time.

Brenda Vallee
Colfax LA

Here is the power point from the presentation yesterday.

292 individuals registered from 37 states and the District of Columbia.

Wilma

Good morning,

Holly has graciously offered to serve as another co-host to keep an eye out for un-muted microphones or other issues (thank you!), so I'm copying her on this email.

Jenifer and Wilma, I am attaching a word document with some questions that we might ask you if there is a lull in questions from the audience. I am also attaching the registration list and the final version of the PowerPoint with the intro, Wilma's presentation, and some closing slides. NOTE – there are a few small changes to my slides to help me with the flow. Wilma, no changes were made to your slides.

Margaret, Jen RB and I did a quick practice run yesterday and we are in good shape! I am going to start the meeting at 2:00 just so I can get oriented and have it set up exactly the way I did for our run through. No one else needs to join that early, but I will be there if you want to check in.

I'm so excited for this and thank you all.

Jen Irving, MPH

Doctoral Student, Department of Environmental Sciences

Louisiana State University

Research Translation Coordinator, LSU Superfund Research Center
